

Afghanistan: Earthquake Events Overview, April 2024

Five highest EQ magnitude events during the period

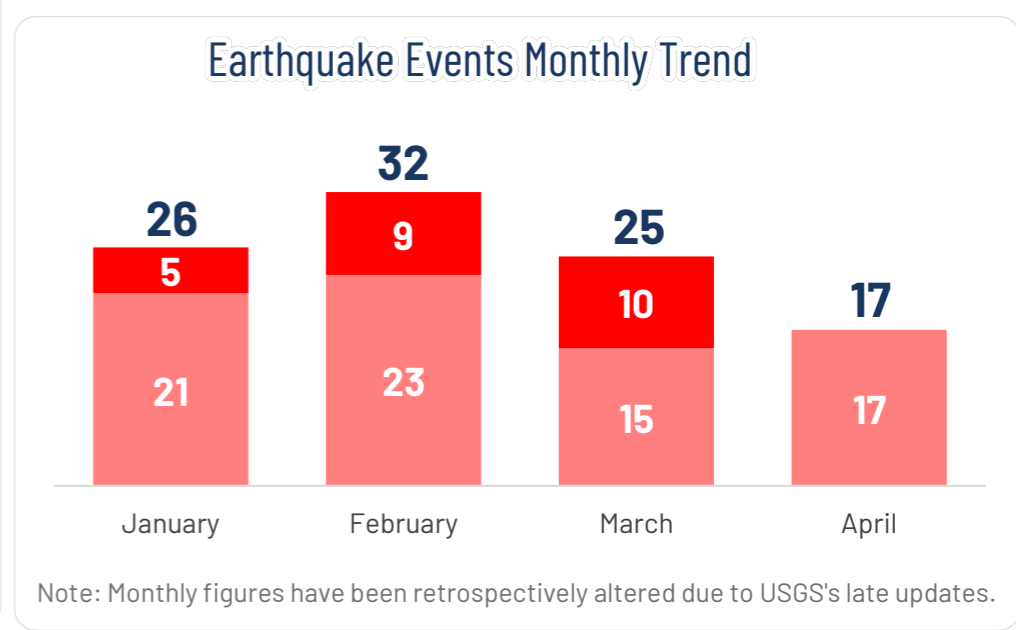

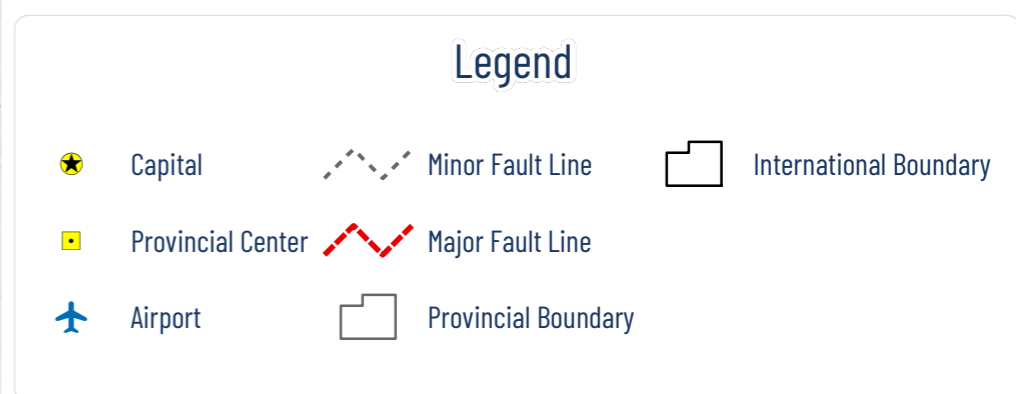

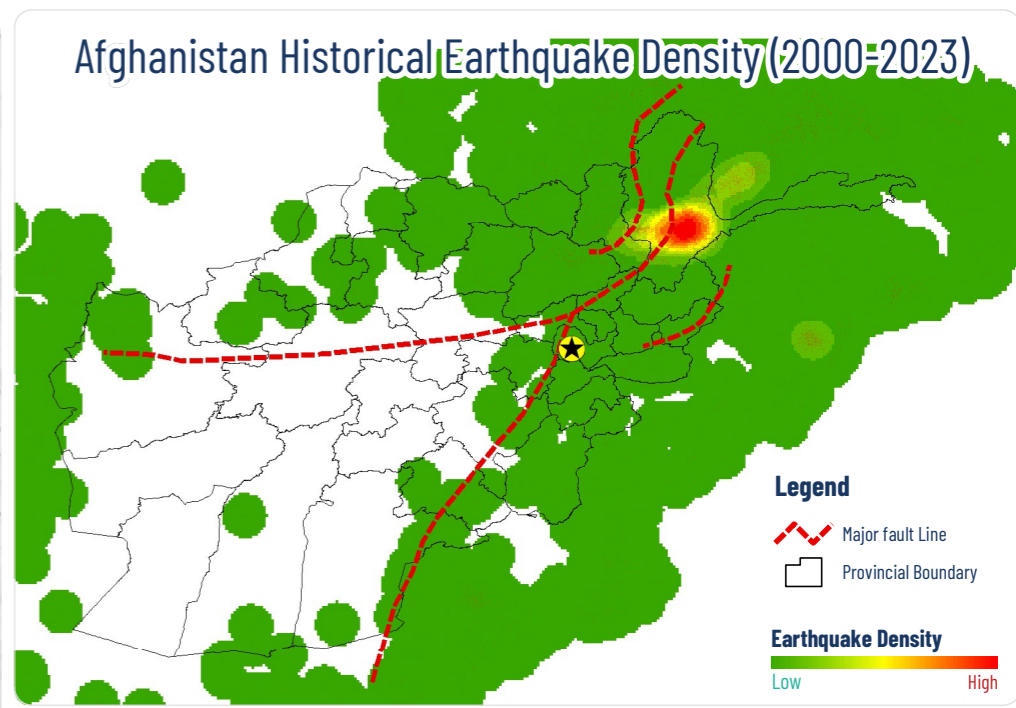

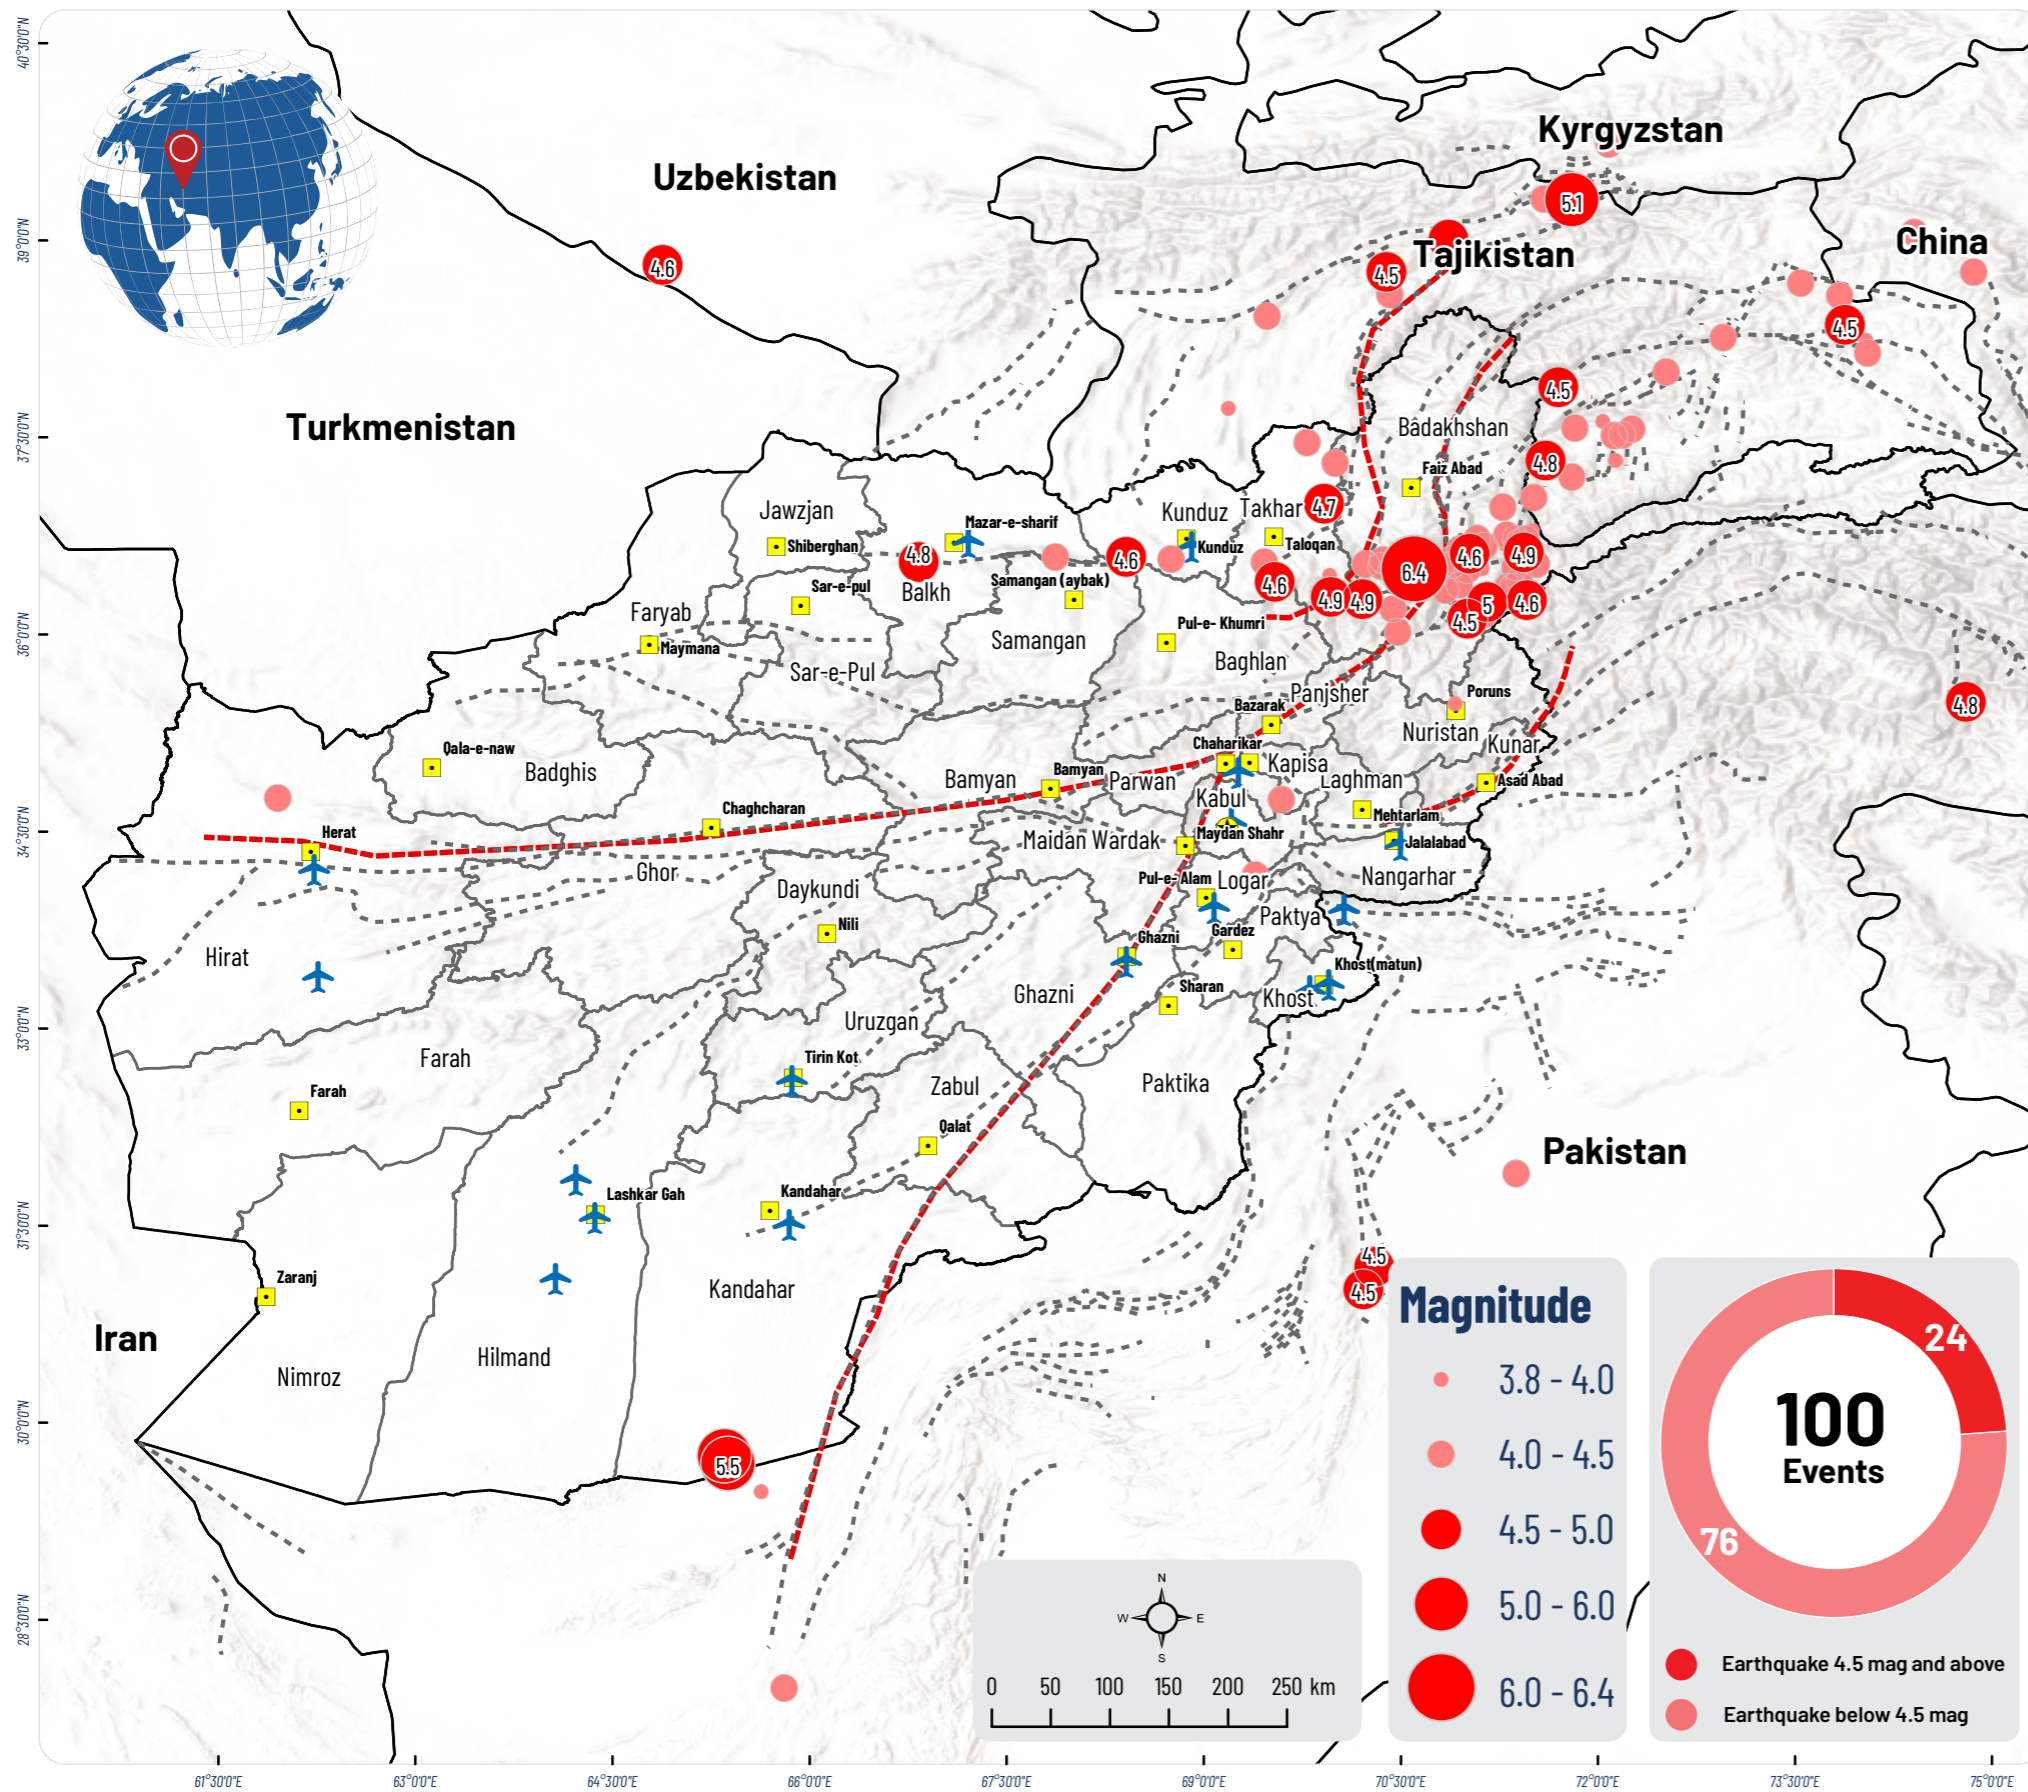

Magnitude	Depth (km)	Date/Time (Kabul)	Latitude	Longitude	Place
4.4	91	4/8/2024 4:04	36.0165	70.4787	77 km NNW of Pārūn, Afghanistan
4.4	10	4/6/2024 10:42	31.8969	71.3791	8 km NW of Dullewala, Pakistan
4.3	10	4/5/2024 22:50	34.1662	69.3957	23 km W of Ḥukūmatī Azrah, Afghanistan
4.2	122	4/29/2024 1:13	37.9953	72.5203	102 km ENE of Khorugh, Tajikistan
4.2	44	4/23/2024 1:30	36.5721	68.7507	19 km SSW of Kunduz, Afghanistan

Description: This comprehensive map provides an overview of the earthquake events that occurred in April, 2024, encompassing both Afghanistan and regions up to 200 kilometers beyond its borders. Known for its high seismic activity, Afghanistan is recognized as one of the world's most seismically active countries. The data utilized in this map were sourced from the USGS online database (<https://earthquake.usgs.gov/earthquakes/search/>).
