

The following highlights provide a summary of the training needs assessment (TNA) survey conducted in April – May 2024, which aimed to provide an accurate and timely snapshot of Data Literacy capacities and gaps among iMMAP stakeholders in Afghanistan (e.g. national and local organizations, including clusters, UN agencies, INGOs, NGOs and CSOs). The feedback gathered during the survey was analyzed to generate insights into their capabilities, challenges, and specific areas where additional training and capacity-building are required. This information will help design targeted training programs that enhance the data management and analytical skills of humanitarian partners, ultimately improving the effectiveness and efficiency of humanitarian response efforts.

Protection **(12%)**

AFGHANISTAN: HUMANITARIAN DATA LITERACY – TRAINING NEEDS ASSESSMENT

Summary Findings Infographic: DATA AND INFORMATION NEEDS OVERVIEW

The following highlights provide a summary of the training needs assessment (TNA) survey conducted in April – May 2024, which aimed to provide an accurate and timely snapshot of Data Literacy capacities and gaps among iMMAP stakeholders in Afghanistan (e.g. national and local organizations, including clusters, UN agencies, INGOs, NGOs and CSOs). The feedback gathered during the survey was analyzed to generate insights into their capabilities, challenges, and specific areas where additional training and capacity-building are required. This information will help design targeted training programs that enhance the data management and analytical skills of humanitarian partners, ultimately improving the effectiveness and efficiency of humanitarian response efforts.

Primary Challenges or Gaps in M&E and Accountability to Donors/Affected Populations

Insufficient capacity or training in M&E methodologies	Challenges in effectively engaging w/ diverse stakeholders, including local communities & authorities	Inadequate risk management practices in navigating the volatile operational environment	Weak accountability mechanisms for ensuring transparency & responsiveness to affected populations
Limited access to reliable data sources	Financial management constraints impacting accountability and transparency to donors	Limited understanding of gender and inclusion considerations in M&E processes	Difficulties in meeting donor reporting requirements and compliance standards

AFGHANISTAN: HUMANITARIAN DATA LITERACY – TRAINING NEEDS ASSESSMENT

Summary Findings Infographic: CAPACITY BUILDING NEEDS OVERVIEW

The following highlights provide a summary of the training needs assessment (TNA) survey conducted in April – May 2024, which aimed to provide an accurate and timely snapshot of Data Literacy capacities and gaps among iMMAP stakeholders in Afghanistan (e.g. national and local organizations, including clusters, UN agencies, INGOs, NGOs and CSOs). The feedback gathered during the survey was analyzed to generate insights into their capabilities, challenges, and specific areas where additional training and capacity-building are required. This information will help design targeted training programs that enhance the data management and analytical skills of humanitarian partners, ultimately improving the effectiveness and efficiency of humanitarian response efforts.
