

Afghanistan: Earthquake Events Overview, February 2024

Five highest EQ magnitude events during the period

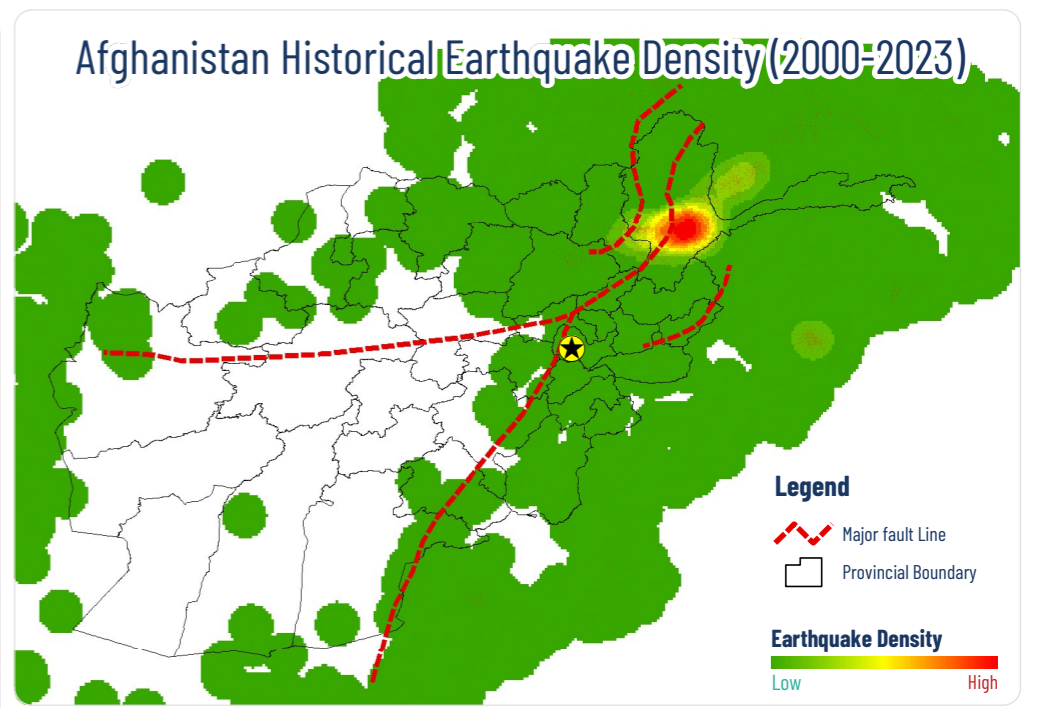

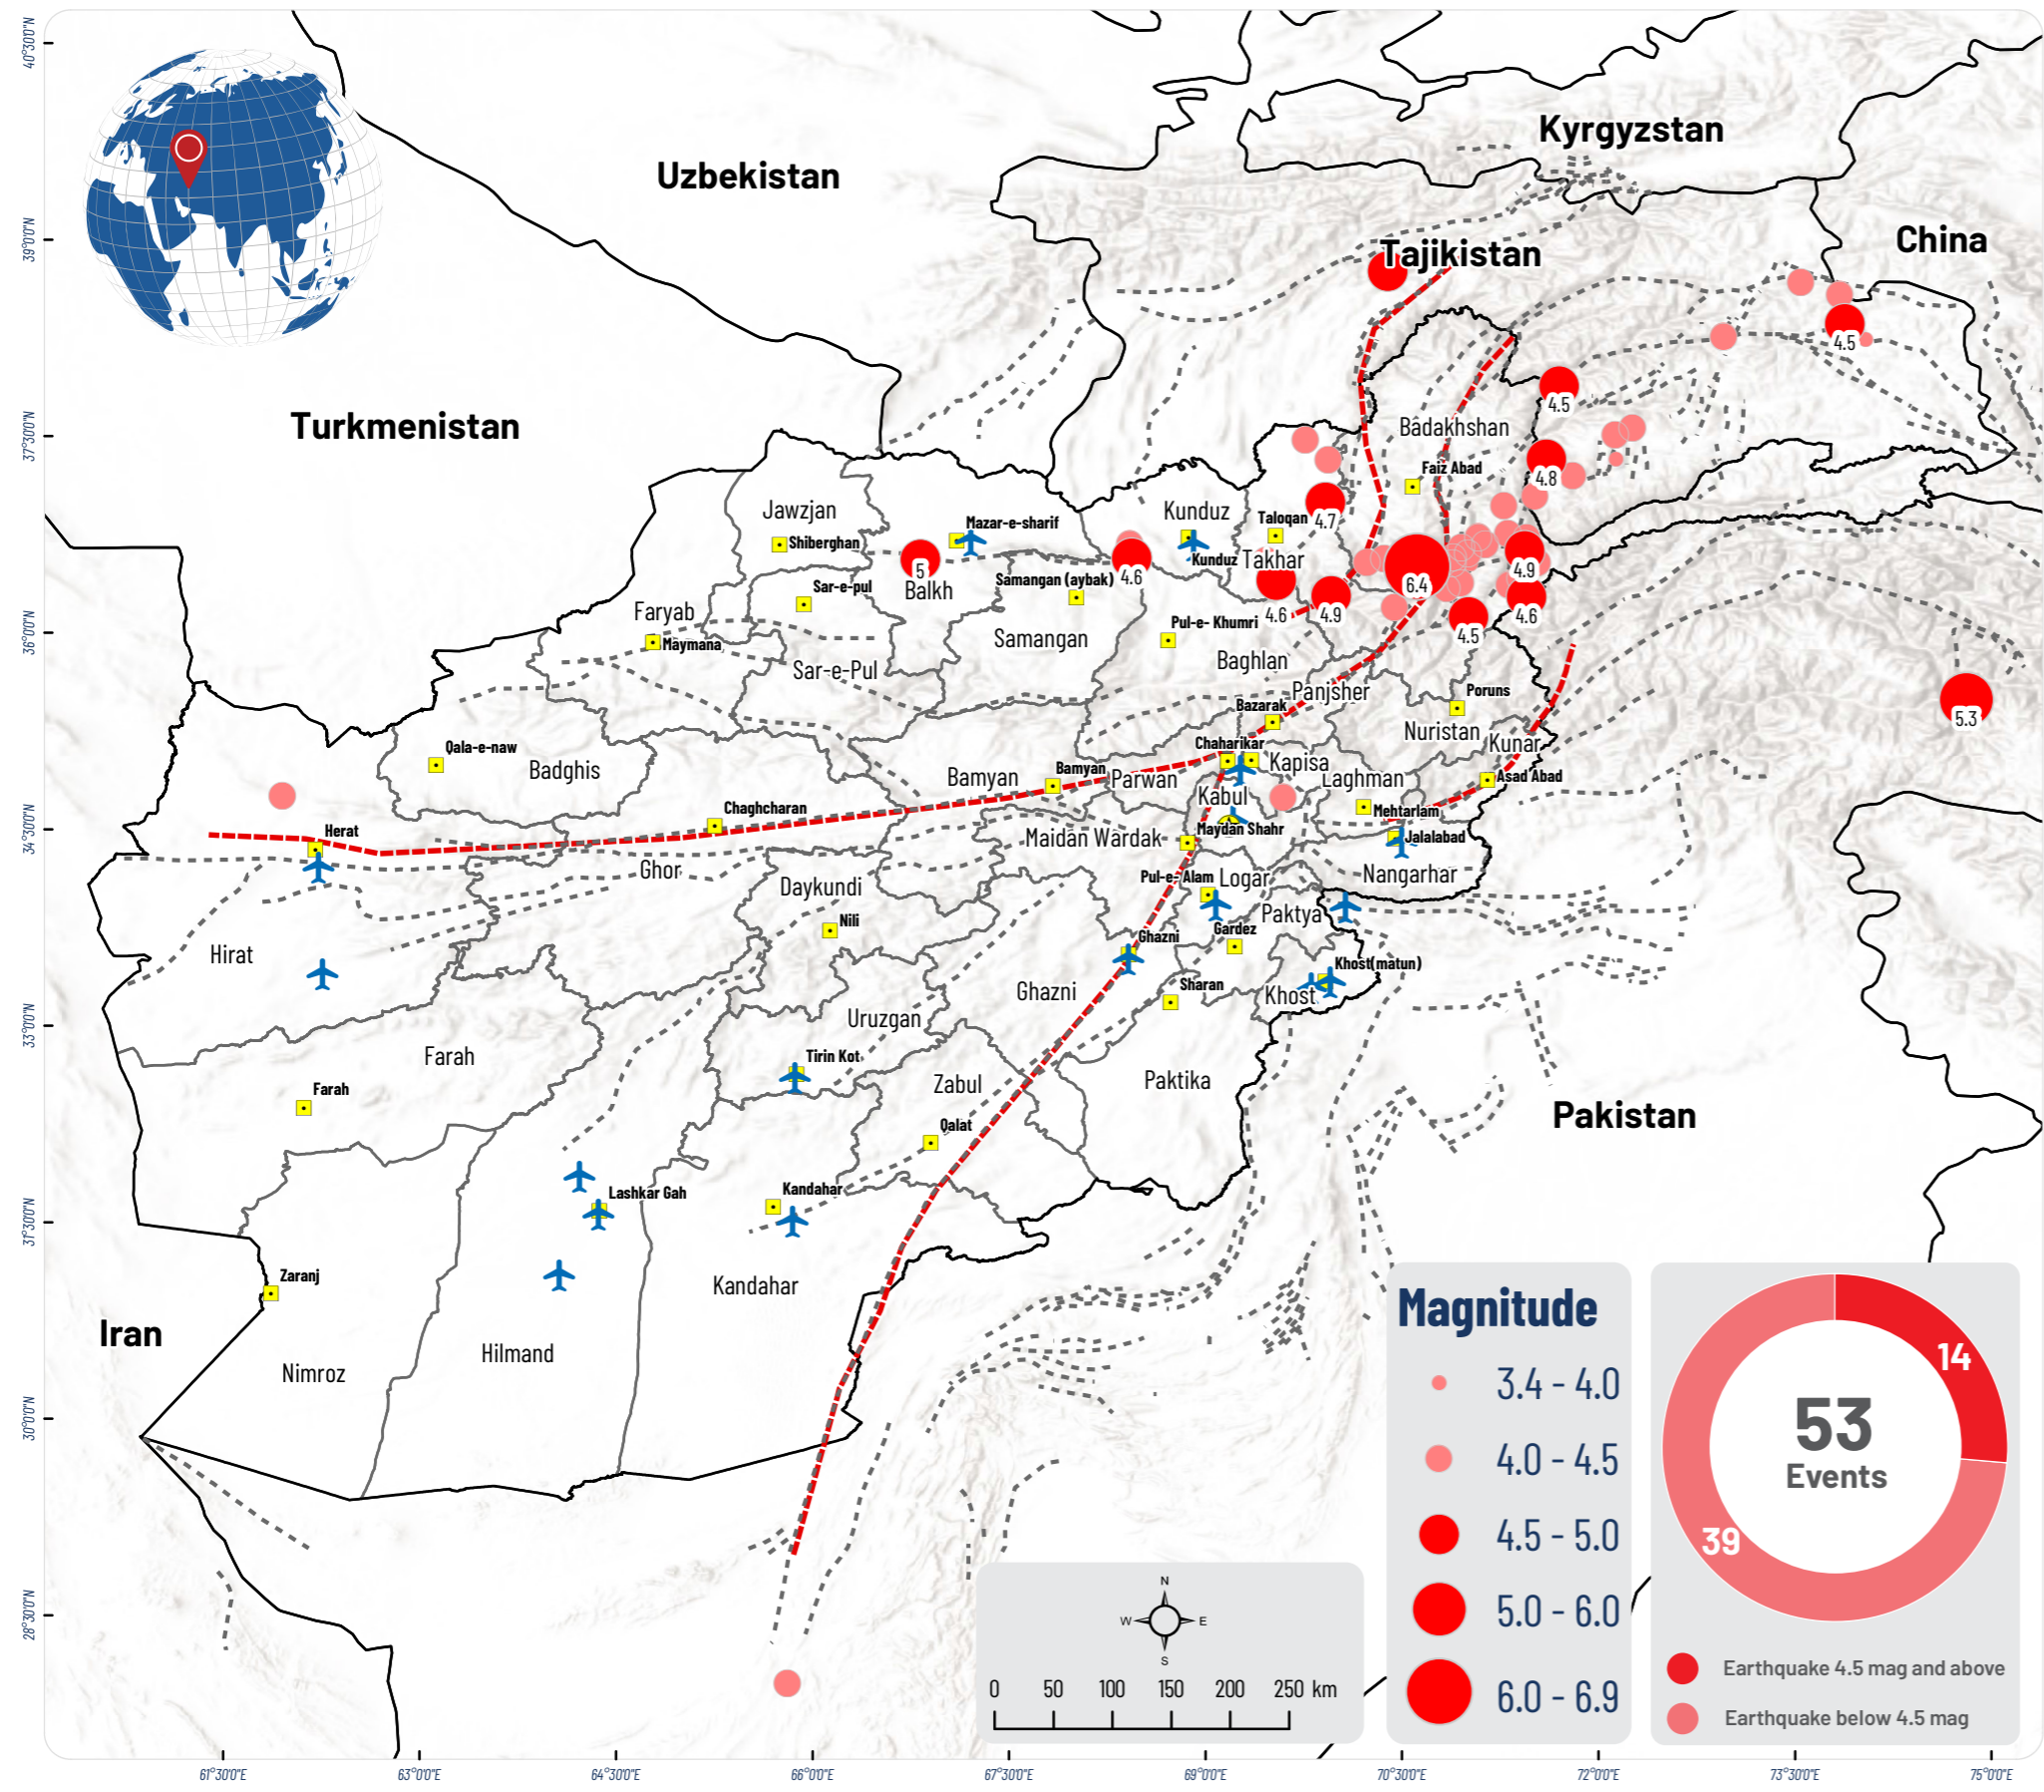

Magnitude	Depth (km)	Date/Time (Kabul)	Latitude	Longitude	Place
5.3	10	2/19/2024 20:35	35.4912	74.8099	65 km SE of Gilgit, Pakistan
5.0	10	2/18/2024 15:50	36.5607	66.8257	22 km SSW of Balkh, Afghanistan
4.9	143	2/10/2024 22:14	36.2817	69.9599	33 km SSE of Farkhār, Afghanistan
4.6	10	2/23/2024 8:58	36.5706	68.4384	41 km WSW of Kunduz, Afghanistan
4.6	111	2/16/2024 23:57	36.2741	71.4524	45 km S of Ashkāsham, Afghanistan

Description: This comprehensive map provides an overview of the earthquake events that occurred in February, 2024, encompassing both Afghanistan and regions up to 200 kilometers beyond its borders. Known for its high seismic activity, Afghanistan is recognized as one of the world's most seismically active countries. The data utilized in this map were sourced from the USGS online database (<https://earthquake.usgs.gov/earthquakes/search/>).
