

Information Management for Emergency Response in Afghanistan (IMERA II)

iMAP Afghanistan

Funded by USAID Bureau for Humanitarian Assistance (BHA), iMAP has been actively operating in Afghanistan since 2010.

iMAP delivers information management (IM) products and services to key partners in humanitarian response and Disaster Risk Reduction (DRR), including humanitarian clusters, USAID BHA implementing partners, OCHA, the Afghan Government, and civil society.

We work towards ensuring that data consistency and standardization is integrated into all systems for a more efficient and cost-effective emergency response by all humanitarian actors.

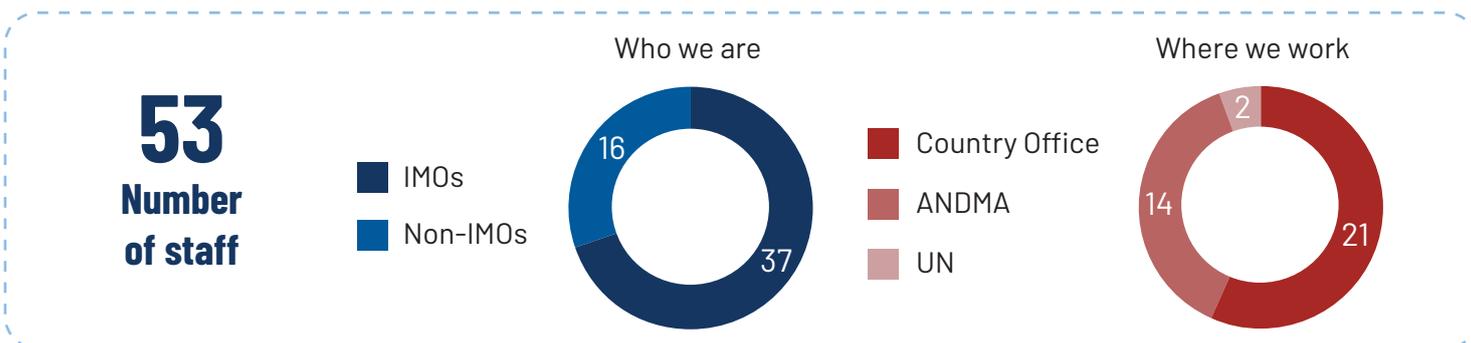

Years of presence in Afghanistan: **Since 2010**

Donor: **USAID BHA**

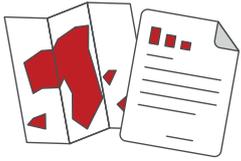

Current project: **Information Management for Emergency Response in Afghanistan (IMERA II)**

Project budget: **\$3,392,000**

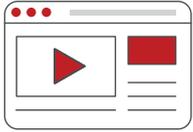

Number of organizations iMAP currently supports: **30 (ASDC), 83 (ReportHub)**

Services

IM Services: iMMAP provides ad-hoc IM support to all the humanitarian clusters for specialized tasks from our country office. As well as deployments to UNHCR and WHO through the dedicated Standby Partnership Program.

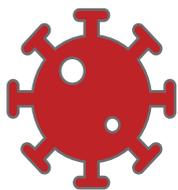

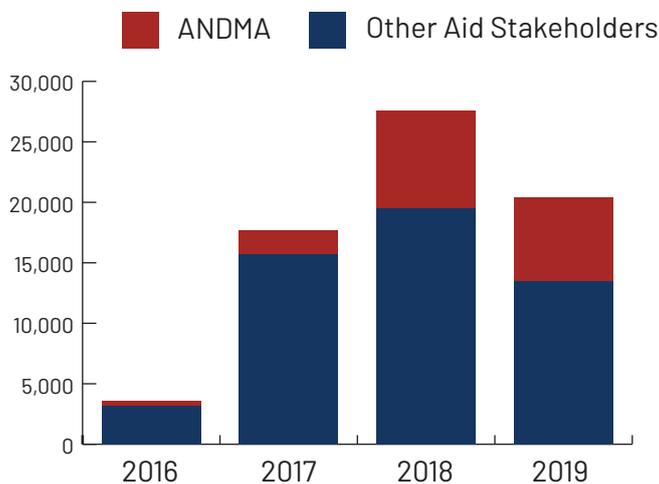

ASDC: The Afghanistan Spatial Data Center (ASDC) is a geospatial platform that provides critical information to line ministries and aid organizations for DRR, planning, and emergency response. Users can access updated interactive dashboards and maps.

ANDMA: iMMAP provides close support to the Afghanistan National Disaster Management Authority (ANDMA) through capacity building to enhance ANDMA's DRR activities, mapping, and IM. iMMAP is also providing surge capacity support to ANDMA by seconding 14 national information experts.

Unique ASDC products delivered by year

COVID-19: Despite COVID-19's impact on operations, iMMAP remains committed to its mission in Afghanistan. Within the framework of ongoing support, iMMAP is assisting the clusters and cluster members to monitor the COVID-19 response through ReportHub and providing our partners with remote IM assistance.

ReportHub: ReportHub is an online reporting platform that addresses the gap in reporting operational data across organizations by streamlining the information flow between clusters, working groups, partners, and the Humanitarian Country Team in support of the Humanitarian Response Plan.
