The following highlights provide a summary of the survey conducted in February 2023, which aimed to identify gaps in Information Management (IM), Assessments, and Capacity-Building among humanitarian partners, clusters, sub-clusters, and working groups involved in the response efforts in Afghanistan. The feedback gathered during the survey was analyzed to generate crucial evidence that will support advocacy for optimizing humanitarian information management and assessment capacities in the country. This includes improving data exchange mechanisms, assessment priorities, and capacity strengthening efforts.
