Target:	2.5M	1,252,863	679,716	657,437
Reached:	1.6M	1,009,857	470,390	125,287

Indicator 1.1: Full ESNFI Kits

Provide safe, appropriate and critical life-saving emergency shelter and non-food items to displaced affected population. The cluster reached **1,009,857** people.

Indicator 1.2: NFI Kits

Provide appropriate and critical life-saving non food items to safeguard the health and protection of returnees. The cluster reached **470,390** people.

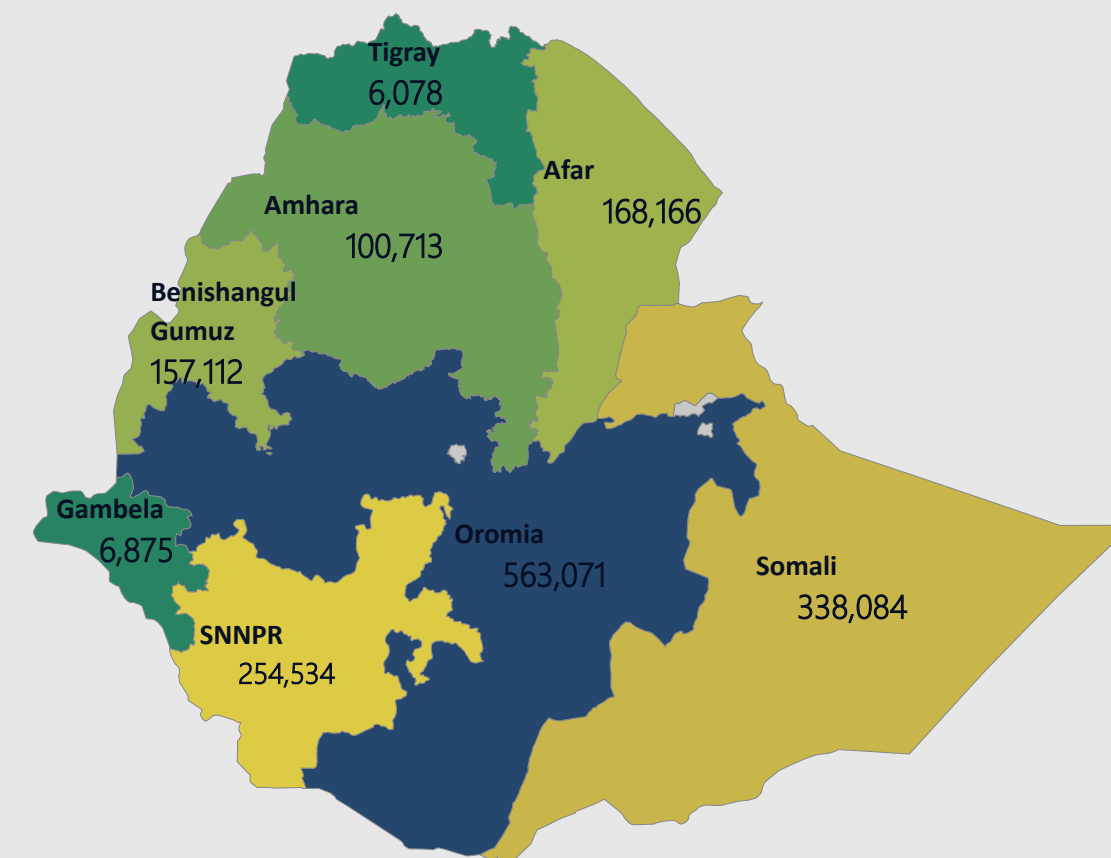

Indicator 3.1: Repair Kits

Improve the living condition of the returnee whose houses are damaged by providing partial repair kits. The cluster reached **125,287** people.

Progress: The Shelter/NFI cluster has continued to deliver a combination of life-saving (emergency and longer lasting shelter solution to its targeted population. Since January 2019, the cluster has reached 1.6 milion displaced affected populations with ESNFI kits and emergency shelter repair kits. The shelter response is complemented with HLP and technical support as necessary.

Challenges: Limited resources (only 19.87% funded from financial requirement), climate-induced displacement, access due to insincerity, unresolved HLP issues, and lack/limited access to poor road conditions are the main challenges partners have faced while providing shelter support accross the country.

Key Figures

	<u>Overall</u>	<u>ESNFI</u>	<u>NFI</u>	<u>Repair Kit</u>
Target:	174K	160,578	97,719	56,226
Reached:	305K	157,806	144,226	2,674

Indicator 1.1: Provide safe, appropriate and critical life-saving emergency shelter and non-food items to displaced affected population. The cluster reached **157,806** people.

Indicator 1.2: Provide appropriate and critical life-saving non food items to safeguard the health and protection of returnees. The cluster reached **144,226** people.

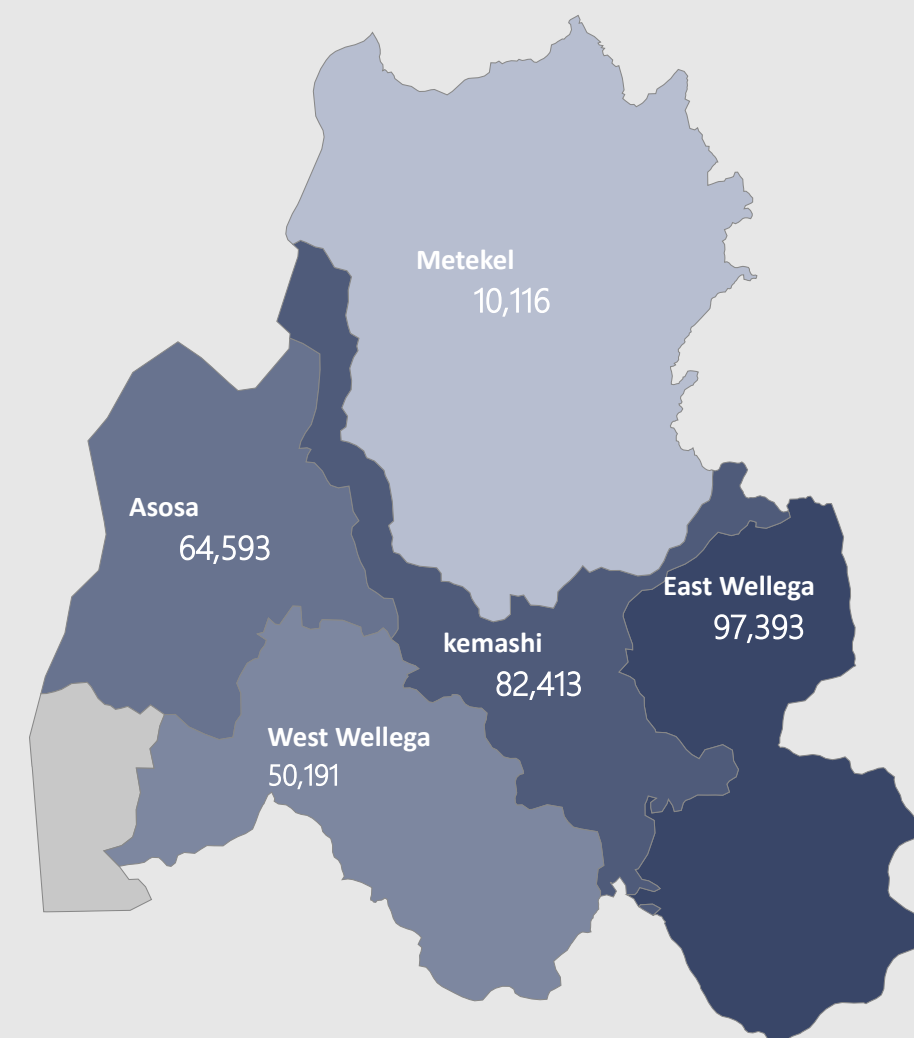

Indicator 3.1: Improve the living condition of the returnee whose houses are damaged by providing partial repair kits. The cluster reached **2,674** people.

Progress: The Shelter/NFI cluster has continued to deliver a combination of life-saving (emergency and longer lasting shelter solution to its targeted population. Since Jan 2019, in East and West Wellega zones, the cluster has reached 303,722 displaced affected populations with ESNFI kits and emergency shelter repair kits. The shelter response is complemented with HLP and technical support as necessary.

Challenges: Lack of access due to insecurity and difficulty physically accessing sites due to the rainy season are the main challenges in West Wellega. HLP issues limit what kind of services partners can provide and can take time to resolve with local authorities are the main challenges in East Wellega. In Benishangul Gumuz, Kemashi Zone, the security situation has improved recently, but ES/NFI activities are behind due to a longer period of insecurity when actors could not access sites and difficulty physically accessing sites due to the rainy season are the main challenges.
