AFGHANISTAN: INFORMATION MANAGEMENT, ASSESSMENT AND CAPACITY BUILDING GAPS SURVEY

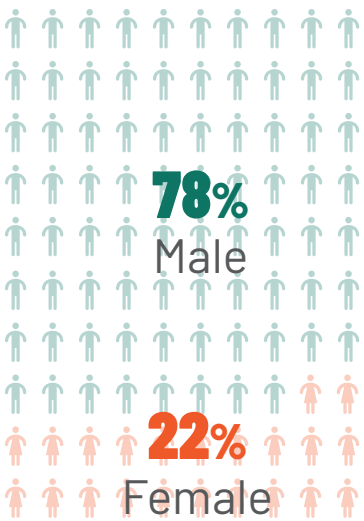
CLICK HERE to view the online dynamic dashboard for more detailed survey findings. See the succeeding pages for sector-specific highlights.

SUMMARY FINDINGS - HEALTH CLUSTER

The following highlights provide a summary of the survey conducted in February 2023, which aimed to identify gaps in Information Management (IM), Assessments, and Capacity-Building among humanitarian partners, clusters, sub-clusters, and working groups involved in the response efforts in Afghanistan. The feedback gathered during the survey was analyzed to generate crucial evidence that will support advocacy for optimizing humanitarian information management and assessment capacities in the country. This includes improving data exchange mechanisms, assessment priorities, and capacity strengthening efforts.

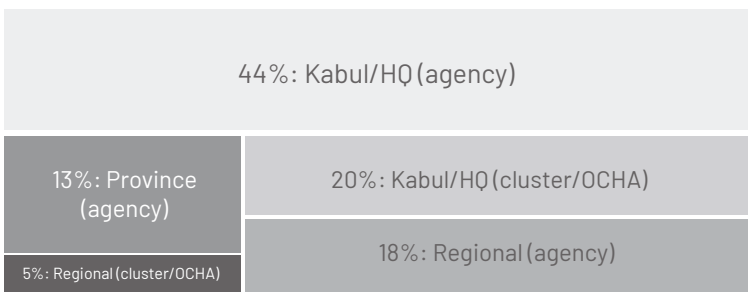
Respondents Overview

55 Total Number of Respondents



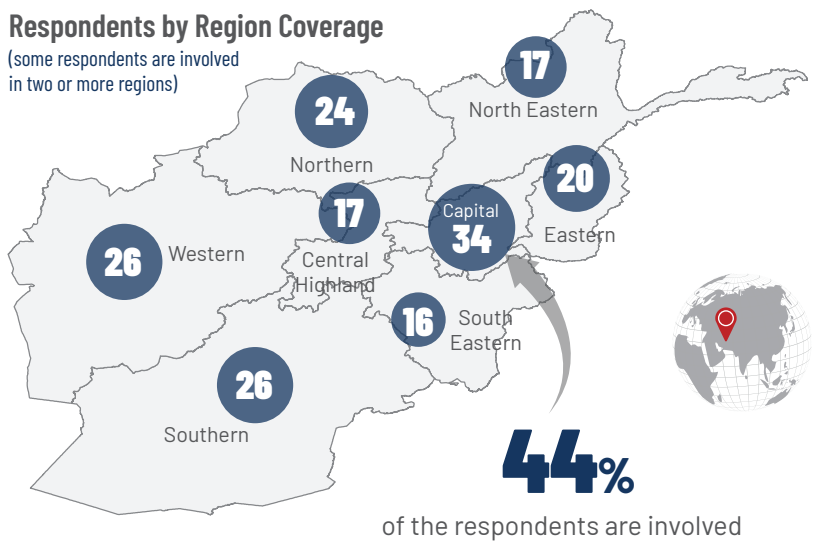
Respondents by Agency Type

Level of Program Coordination or Support Involved



Respondents by Region Coverage

(some respondents are involved in two or more regions)



44% of the respondents are involved at **Kabul/HQ (agency) level** in terms of program coordination or support

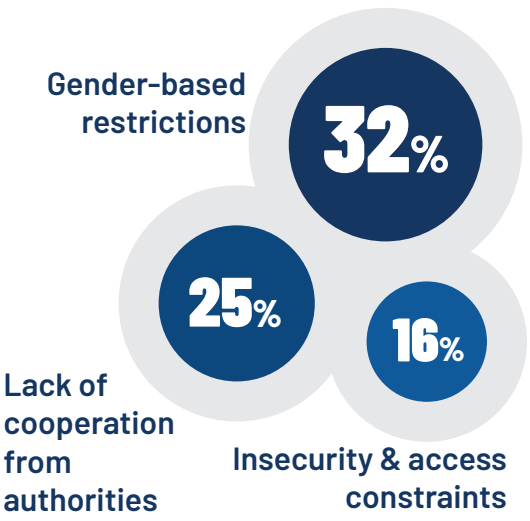
Information Management

Information Management Gaps and Challenges

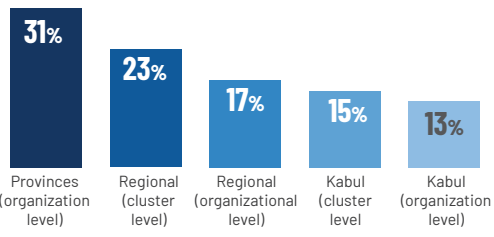
- agencies use both quantitative & qualitative data to support programmes — **95%**
- **73%** are highly dependent on primary/secondary humanitarian data
- **67%** participate in data exchange and different active coordination mechanisms
- Programmes are mostly dependent on data and IM
- Data and information are not timely — **23%**
- **58%** cannot share information or data due to its sensitivity
- **58%** collects some of their own data, but also depends on other data sources
- **38%** identified province (organization level) coordination in terms of IM gaps and access concerns
- **87%** Finds the coordination and received data relevant to their operations
- OCHA — Clusters, Government and OCHA are mostly sources of data and info.

Assessments

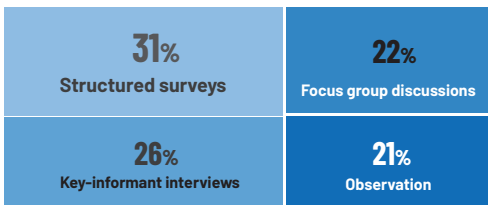
Top 3 Challenges in Conducting Assessments Last Year



Coordination Level Gaps

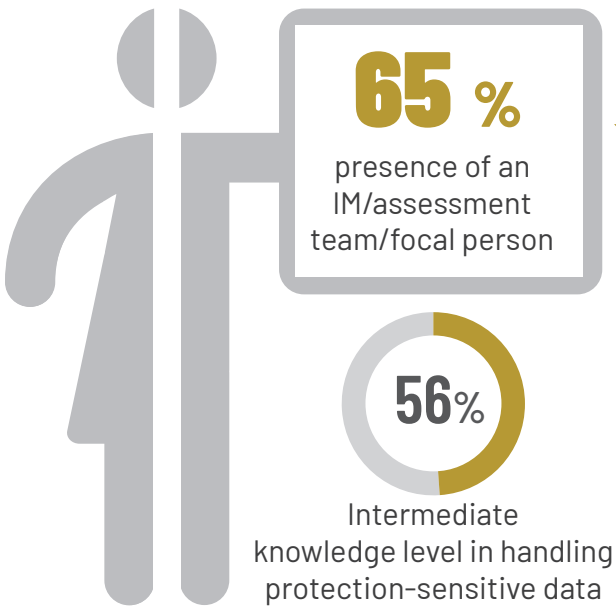


Preferred Data Collection Methods



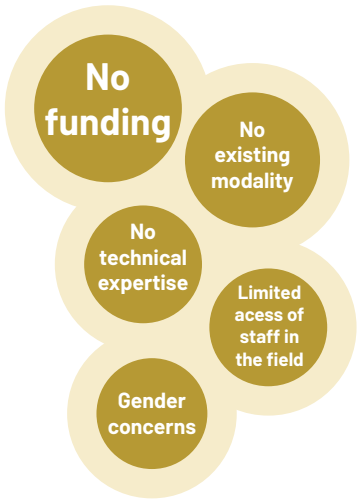
Assessment Gaps and Challenges

Capacity Building



- **29%** Female / **71%** Male
- **60%** prefer face-to-face capacity building modality
- **76%** prefer practical and hands-on capacity building approach

Capacity Building Setbacks



Lowest Data Analysis/IM Capacity at Coordination Level
