

Provision of Information Management Support to the Humanitarian Sectors in Nigeria

The humanitarian crisis in northeast Nigeria remains one of the most severe in the world with **7.1 million people in need** and 6.2 million targeted for humanitarian assistance.

The conflict has caused massive displacement, food shortages, malnutrition, human rights violations, the collapse of basic services, and disease outbreaks, including enormous pressure on host communities.

In the IDP camps of Maiduguri and other settled Local Government Area (LGA) capitals, large portions of the population are extremely vulnerable.

iMMAP in Nigeria

Since November 2016, iMMAP has been providing information management (IM) support to most humanitarian sectors responding to the crisis in northeast Nigeria. iMMAP currently supports eleven sectors.

This program aims at strengthening the IM capacity of the humanitarian sectors in the country, as well as supporting information flow from sectors and inter-sectoral analysis. A key component of this project is the building of the national IM capacity, with the aim of ensuring sustained and skilled support to the sectors when the project completes.

Our previous work over the last year resulted in impactful, short and medium-term outcomes that improved response.

Activities and accomplishments

5W templates

All sectors reached a level of consistency in data collection using enhanced, harmonized, and user-friendly 5W templates. The iMMAP IMOs are facilitating the sectors through the preparation of analyses, incorporated into operational planning and coordination.

Targeted response

Analysis of the gaps up to the lowest administrative levels (Ward and LGA) continues to

provide valuable information to responding organizations, enabling targeted response.

Innovative IM approaches

Improving data collection, analysis and reporting across all

sectors, and making cross-sector comparison possible. In all the sectors supported by iMMAP, the staff is laying the foundation for proper data visualization by creating geo-databases and developing product templates.

Capacity Building

iMMAP rolled out its Humanitarian Information Management Training and Capacity Building Program in Nigeria in January 2018. The purpose of the program is to facilitate capacity building, capacity strengthening and to empower humanitarian partners to leverage and optimize information management tools, technologies, platforms, and best practices to effectively respond to the humanitarian crisis.
