iMMAP Stand-by Partnership Programme

iMMAP

The United Nations responds to many human-made and natural crises around the world. Every crisis is different, and the UN needs preparadness for unexpected changes and new situations.
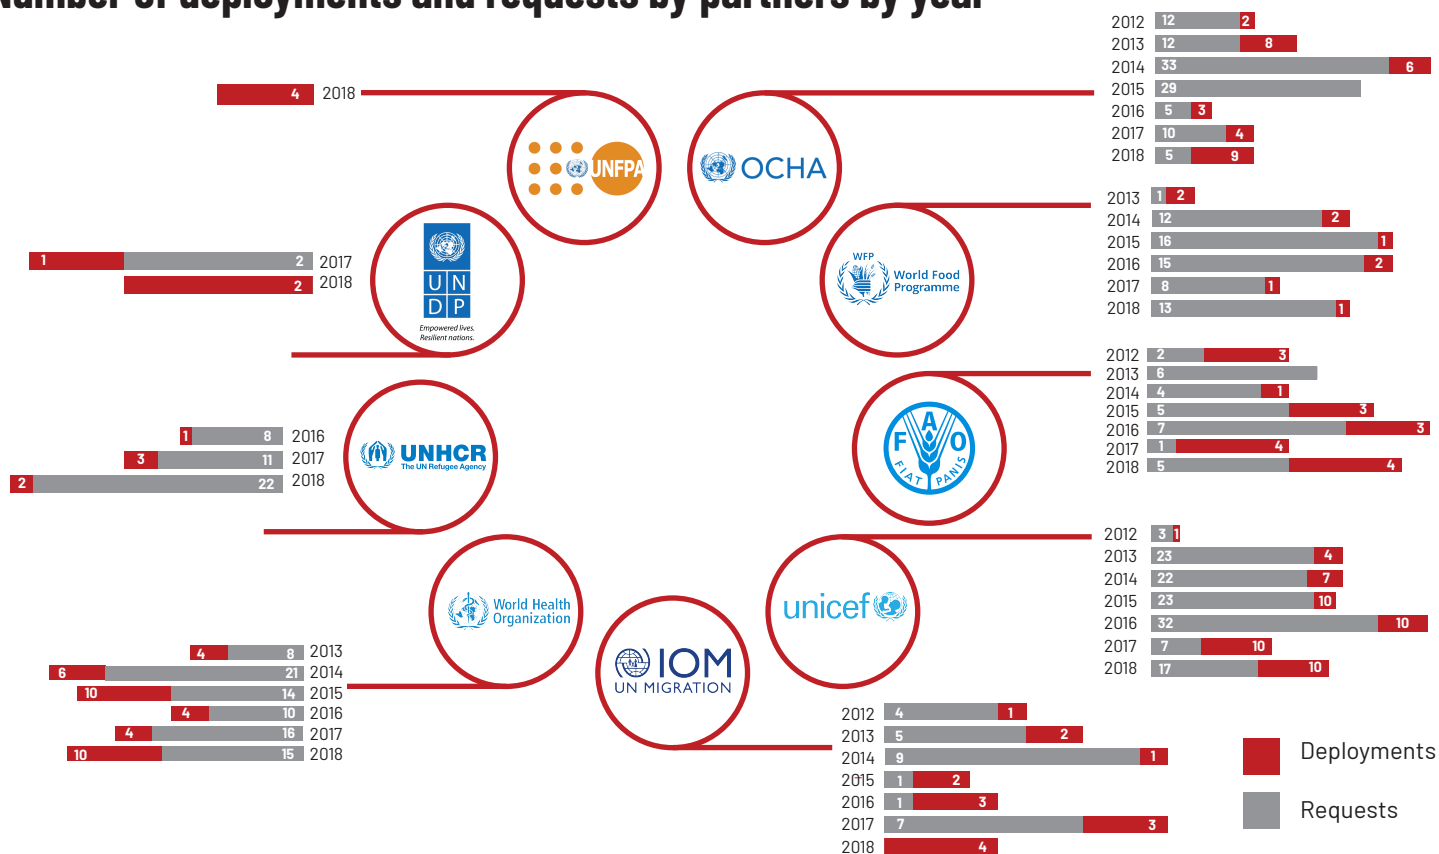

The lack of trusted decision-making data on which to base decisions has a direct impact on the lives and livelihoods of beneficiaries; it can affect the allocation and delivery of scarce financial and material resources, and it impedes the development of a clear common operating picture to formulate effective response strategy and policy.

Highly skilled Information Management Officers [IMOs] are called upon to help organizations improve the quality, timeliness, use, and sharing of critical humanitarian response data. However, at times of sudden surge in needs for skilled IM personnel, the UN's international emergency response mechanism faces further challenges in finding and deploying these resources in a timely and sustained manner.

To address these shortfalls, iMMAP maintains a roster of rapidly deployable information management experts to provide surge capacity support in emergency operations through the Stand-By Partnership Programme (SBPP). iMMAP maintains global level SBPP agreements with nine UN agencies. **iMMAP Stand-by Partnership Programme is supported by USAID OFDA.**

## Number of deployments and requests by partners by year

OCHA
Year	Requests	Deployments
2012	12	2
2013	12	8
2014	33	6
2015	29	
2016	5	3
2017	10	4
