Rapid Multi-Sectoral Needs Assessment of Populations Affected by Deyr Flood
Xarardheere District, Somalia, December 2023

- In the surveyed sites, majority identified shelter as priority need for flood-affected men, women, and children. In addition, in-kind assistance (NFIs) and multipurpose cash transfers were as reported for women and men while children identified healthcare services and water.
- Tent was also reported as an urgent non-food item (NFI) requirement in 9 out of 11 sites.
- Borrowing/debt was reported as the primary source of food all sites (11 out of 11), although there was a considerable number of sites, 9 out of 11, that reported distance to the local market could be more than 6 hours after flooding.
- In 11 out of 11 sites, open defecation was reported as the prevailing practice for using latrines, which increases the risk of disease outbreaks such as Cholera.
- Due to the damage caused by the flooding, health facilities have been adversely affected, leading to an increased demand for health services in 10 out of 11 sites. Limited medical outreach services further exacerbate the situation.

9/11 sites reported major increase in the price of NFIs
11/11 sites reported increased cases of acute diarrhoea since the flooding within the community
10/11 sites reported that there are not adequate sanitation facilities or the facilities available are too crowded.

Overview

Heavy rains in the Xarardheere district in October, November and December of 2023 caused significant flooding in several parts of Xarardheere town and the surrounding areas, in Galmudug state of Somalia. The rains mark the beginning of the Deyr (October to December) rainy season in the country, expected to have above-normal rains and flooding due to the influence of the El Niño conditions.

According to SoDMA, at least 2.48 million people have been affected with 1.1 million displaced and 118 killed in the entire country. (UNOCHA) Humanitarian partners have stepped up to meet increased needs despite logistical, access and funding challenges, reaching at least 836,000 people with assistance since October*. The majority of the displaced people have moved to higher ground, closer to their settlements.

Assessment Overview

This assessment involved conducting 46 interviews with key informants at the site level in Xarardheere from December 5th to 8th, 2023.

A total of 11 sites were covered in this assessment. As explained in the Methodology Overview, the results should be considered as indicative.
**Movement Intentions**

Movement Intentions of the Majority of Flood Survivors, by site (out of 11)

- Leave once flooding stops or homes become accessible (undefined): 7
- Stay in this location (current location is their final destination): 2
- Are undecided: 11

**Shelter & Non-Food Items (NFIs)**

Shelter Types, by site (out of 11)

- Makeshift shelter / tent / buul (%): 32%
- Unfinished / non-enclosed building (%): 26%
- Solid / finished house or building (%): 16%

Top 3 Urgent NFI Needs, by site

- 9/11: Tent
- 7/11: Kitchen set
- 4/11: Plastic sheets & solar lamp

**Priority Needs**

3 Common Priority Needs, by site (out of 11)

Education

2/11 sites reported that flooding has affected the attendance of school children.

Common Impacts of School Attendance
From 2 flood-impacted sites

- 2/2 Schools/learning spaces are destroyed/damaged
- 2/2 Schools are used for affected population shelter
- 1/2 Schools/learning spaces are not accessible due to mud
- 1/2 Children and teachers are psychologically distressed

Critical Education Needs for Flood Survivors, by site (out of 11)

- Provision of new learning spaces
- Provision of safe drinking water at school
- Teachers
- Teaching materials for teachers
- Rehabilitation of the existing learning spaces

Protection

Common Safety & Security Concerns for Women & Girls Flood Survivors, by site (out of 11)

- Suffering from verbal harassment: 10
- Being robbed: 10
- Being threatened with violence: 9
- Female Genital Mutilation (FGM): 8
- Gender-based violence (GBV): 6
- Being kidnapped: 6
- Physical harassment or violence: 5

Common Safety & Security Concerns for Men & Boys Flood Survivors, by site (out of 11)

- Being robbed: 10
- Being threatened with violence: 9
- Suffering from verbal harassment: 8
- Suffering from physical harassment or violence (not sexual): 6
- Female Genital Mutilation (FGM): 5
- Being kidnapped (Abduction, kidnapping, enforced disappearance): 5

Infrastructure Functionality

Common Primary Means of Access to Sites (out of 11)

- Path (foot / donkey cart / motorcycle only): 10
- Road (small vehicles only: no trucks): 9
- Road (all vehicles): 3

Infrastructure Functionality Status After the Flood by Site (out of 11)

<table>
<thead>
<tr>

*Electricity functionality is defined as functional (8+ hours/day), irregular (1-7 hours/day), not functional (0 hours/day)

Accountability to Affected Population (AAP)

7/11 sites reported that they faced problems obtaining humanitarian assistance after flood. Another 3 reported that there was no humanitarian assistance after flood.

Flood Survivors’ Preferred Feedback Method, by site (out of 11)

- Hotline: 11
- SMS: 11
- Religious leader: 9
- Community leaders: 8
- Information desk: 8

Common Challenges for Flood Survivors

2/6 Reported that information on entitlement was not shared with community. Another 1 site reported that money is asked by service provider in exchange for assistance.

Flood Survivors’ Preferred Communication Method, by site (out of 11)

- Phone call: 11
- SMS: 11
- Poster / flip charts: 10
- Information / protection desk: 9

Humanitarian Access

Common Key Coordinators in Aid Delivery, by site (out of 11)

- Local civilian authority: 2
- Humanitarian affairs office / relief office: 2
- Somali government: 1
**Overview & Methodology**

The assessment was conducted between 5–8 December 2023, with 46 quantitative, structured face-to-face key informant (KI) interviews across 11 sites in Xarardheere using a survey tool developed and adopted by ICCG and OCHA, deployed through the KoBo tool.

During the cleaning exercise, the interview duration that lasted less than 15 minutes was excluded based on consultation with OCHA, resulting in the omission of some of the responses. In addition, in the analysis of single-choice questions, the responses from different key informants reporting on the same site were calculated by “Distinct Count”.

When it comes to single-option indicators, the results are displayed as the number of sites and reported at the district level. For select multiple indicators, all key informant responses are included in the aggregated results.

The results are presented as the number of sites where key informants reported a specific outcome (which is the combined result at the site level as explained earlier). For integer responses, the median value was reported at the site level.

**Limitations**

The results presented in this assessment are based on the perspectives of the key informants and should be understood as indicative only. It is important to note that the analysis did not assign weights to key informant profiles, which means that some key informants may possess more knowledge on certain subjects compared to others. Therefore, the aggregated site-level results should be interpreted with this limitation in mind. Additionally, due to the key informant approach used, it is not possible to disaggregate the results by gender, age, or disability status of the respondents.

**KIs by Gender**

![Female Male](chart)

- Female: 2%
- Male: 98%

**KIs by Professions**

- Community leader (host community): 13
- Community leader (IDP): 5
- Local councilperson: 1
- Member of civil society group: 21
- Member of local relief committee: 3
- Registration focal person: 2
- Teacher: 1

**About iMMAP Inc.**

iMMAP Inc. is an international not-for-profit organization that provides information management services to humanitarian and development organizations, enabling partners to make informed decisions that ultimately provide high-quality targeted assistance to the world’s most vulnerable populations.

We support humanitarian actors to solve operational and strategic challenges. Our pioneering approach facilitates informed and effective emergency preparedness, humanitarian response, and development aid activities by enabling evidence-based decision-making for UN agencies, humanitarian cluster/sector leads, NGOs, and government operations.
