# Humanitarian Information Management for Natural Hazard Emergency Response in Afghanistan

(HIM-NHER)

## Context

Over 40 years of conflict and insecurity, recurrent natural hazards, increasing poverty, drought, and the COVID-19 pandemic have – and continue to – devastate the people of Afghanistan, severely depleting their capacity to cope with increasing needs.

Between November 2021 and March 2022 (the winter lean season), a deterioration in food security is expected, with the number of people in IPC Phase 3 or above likely increasing to 22.8 million, a nearly 35% increase from the same season last year (16.9 million).

While the overall level of conflict has now dropped, recent events and their resulting upheaval have only exacerbated needs and further complicated an extremely challenging operational context. A total of 18.4 million people across Afghanistan are in need of life-saving humanitarian assistance in 2021.

## iMMAP Afghanistan

Funded by USAID, iMMAP has been actively operating in Afghanistan since 2010.

iMMAP delivers Information Management (IM) products and services to key partners in humanitarian response and Disaster Risk Reduction (DRR), including but not limited to the humanitarian clusters, UN agencies, USAID implementing partners, and NGOs.

iMMAP works towards ensuring that data consistency and standardization is integrated into all systems for a more efficient and cost-effective emergency response by humanitarian actors.

**Donor:** USAID

**Presence in Afghanistan:** Since 2010

**Current project:** Humanitarian Information Management for Natural Hazard Emergency Response in Afghanistan (HIM-NHER)

**Project budget:** USD 3,063,000

**Number of partners iMMAP currently supports:** 92

## Personnel

Number of personnel: 42

- Men
- Women
- National
- International

## Services

**Information management services:** iMMAP provides ad-hoc IM support to all the humanitarian clusters for specialized tasks, such as the production of operational presence dashboards.

**ReportHub:** ReportHub is an online reporting platform that addresses the gap in reporting operational data across organizations by streamlining the information flow between clusters, working groups, partners, and the Humanitarian Country Team in support of the Humanitarian Response Plan.

**COVID-19:** Within the framework of ongoing support, iMMAP is assisting the clusters and cluster members to monitor the COVID-19 response through ReportHub and providing our partners with remote IM assistance.

**Standby partnership:** iMMAP's IMO seconded to the ES-NFI Cluster is helping to inform the cluster's operations and strengthen its response by consolidating, analyzing, and visualizing data, including data submitted to ReportHub.

**HNO/HRP support:** Support clusters in the estimation of planning figures for the Humanitarian Needs Overview, cluster inputs to the Humanitarian Response Plan, and monitoring the quarterly and annual People Reached figures to OCHA's Response Planning and Monitoring Module platform.

**Capacity building:** We empower humanitarian stakeholders and national capacities to reach a professional understanding of the principles and best practices of IM in humanitarian and DRR contexts. This is achieved through our internship program, specialized training, and workshops tailored to the needs of our partners.
