The humanitarian crisis in northeast Nigeria remains one of the most severe in the world with 7.9 million people in need and 5.9 million targeted for humanitarian assistance. The conflict has caused massive displacement, food shortages, malnutrition, human rights violations, the collapse of basic services, and disease outbreaks, including enormous pressure on host communities.

In addition to the ongoing humanitarian emergencies in the country, the COVID-19 pandemic poses a potentially devastating health, social and economic threat to Nigeria, especially for affected populations in the BAY states (Borno, Adamawa and Yobe).

Since November 2016, iMMAP has been providing information management (IM) support to most humanitarian sectors responding to the crisis in northeast Nigeria. iMMAP currently supports nine sectors. This program aims at strengthening the IM capacity of the humanitarian sectors in the country, as well as supporting information flow from sectors and inter-sectoral analysis. Our previous work over the last year resulted in impactful, short and medium-term outcomes that contributed to the response improvement.

In the IDP camps of Maiduguri and other settled Local Government Area (LGA) capitals, large portions of the population are extremely vulnerable.

**Better Data, Better Decisions, Better Outcomes**

**Number of personnel**

- Women: 4
- Men: 17
- International: 2
- National: 19

**Years of presence in Nigeria:**
- Since 2016

**Donors:** USAID OFDA

**Current project:**
- Provision of Information Management Support to the Humanitarian Sectors in Northeast Nigeria

**Project budget:**
- USD 1,587,090.00

As at May 2020
Activities and Accomplishments

Response Monitoring
iMMAP supports sectors in reaching a high level of consistency in data collection using enhanced and user-friendly response monitoring tools including the 5W templates. iMMAP IMOs support the sectors through the preparation of analyses, incorporated into operational planning and coordination.

Targeted Response
Analysis of the humanitarian gaps up to the lowest administrative levels (Ward and LGA) continues to provide valuable information to humanitarian organizations, enabling targeted response.

Innovative IM Approaches
Improving data collection, analysis and reporting in all sectors, and making cross-sector comparison possible. In all the sectors supported by iMMAP, the staff is laying the foundation for proper data visualization by creating geo-databases and developing product templates.

ReportHub Statistics in Nigeria (WASH & Education Sectors):
4,892,419 Individual Beneficiaries

44 Organizations
186 Active projects

8% Elderly, 39% Adults, 53% Children

Male 49%, Female 51%

COVID-19 Response
iMMAP is providing IM support to humanitarian organizations in northeast Nigeria to better respond to and mitigate the effects of the COVID-19 pandemic. We facilitate the development and flow of information between humanitarian actors and organizations on the ground to maximize the effectiveness of the response.

Capacity Building
iMMAP rolled out its Humanitarian Information Management Training and Capacity Building Program in January 2018, to facilitate capacity building and capacity strengthening, empowering humanitarian partners to leverage and optimize information management tools, technologies, and best practices to effectively respond to the humanitarian crisis.

Through a Memorandum of Understanding, iMMAP delivers capacity building in the University of Maiduguri’s advanced computer labs as a sustainable, long-term approach through the training of university staff and graduates.

People Trained Since January 2018:

Over 500 people trained since the start of the program from 144 humanitarian organizations responding to NE Nigeria crisis.

COVID-19 Response Activities by Sector:

- COVID-19 LGA Risk Mapping
- Continuity Plan For WASH Sector
- Education Sector Response Strategy
- COVID-19 Operating Procedures
- Inter-sector Preparedness, Prevention and Response
- GBV Helpline Assessment in the COVID-19 Context
