

Colombia

Information Management Support to Sectors Under GIFMM in Colombia

Context

Nearly 1.8 million Venezuelan migrants and refugees have fled Venezuela to Colombia over the past several years, with no end in sight to the current crisis. The platforms Response for Venezuelas (R4V) and Inter-Agency Mixed Migration Flows Group (GIFMM) were formally launched in November 2019 as part of the Refugee and Migrant Response Plan (RMRP) 2020. A sectoral strategy for the response was considered important in the current context, in order to coordinate with other UN agencies and NGOs with a lead coordination role in each sector: Food Security and Nutrition (WFP, FAO and UNICEF), WASH (UNICEF and Action Against Hunger), Education (UNICEF, NRC, Save the Children), Socio-Economic Integration (IOM, UNDP, PADF) and Health (PAHO/WHO, Ministry of Health). Under the GIFMM umbrella, sectors have the need for support in tasks related to the RMRP program cycle, reporting and the analysis of multi-sectoral needs evaluations.

Donor: US Department of State / Bureau of Population Refugees and Migration (BPRM)

Current project: Information Management Support to Sectors Under GIFMM in Colombia

Project budget: USD \$3,668,847 (3 Years)

Number of partners iMMAP currently supports: 66 GIFMM members and 30 NGO Forum members

iMMAP Colombia

iMMAP has been delivering information management (IM) services to different actors in Colombia since 2009. Currently, iMMAP provides services to coordination spaces, including the Humanitarian Country Team (HCT), the Inter-Agency Mixed Migration Flows Group (GIFMM).

In coordination with the GIFMM, the current project provides services support to the Education, Food Security and Nutrition, Health, Socio-Economic Integration and WASH sectors, as well as the INGO Forum.

Partners participating in the project

RIWI provides global trend tracking, prediction technology and access to fast-changing consumer and citizen sentiment in all countries.

Premise offers an alternative to traditional data collection methods such as time-intensive polls/surveys, or costly direct observation capture in the field.

Web development consulting and development of mobile applications and technological solutions.

Objectives

Year 1

To provide IM products and customized data analysis for monitoring and oversight in humanitarian response to key partners, and building online tools for the response coordination between the GIFMM and the NGO Forum.

To provide increased capacity to prioritized GIFMM and NGO Forum's sectors around IM basics and reporting tools and methods.

Year 2

To provide IM products and customized data analysis for monitoring and oversight in humanitarian response to key partners, and building online tools for the response coordination between the GIFMM and the NGO Forum.

To replicate training among sector members around IM basics and reporting tools and methods, and to provide increased capacity around advanced IM practices and innovative data collection tools.

Year 3

To provide IM products and customized data analysis for monitoring and oversight in humanitarian response to key partners, and building online tools for the response coordination between the GIFMM and the NGO Forum.

To provide training in new and best practices in IM, administration, and innovative data collection tools based on the results of the learning process.
